

SIZE MATTERS

We have experienced that some of our end users may choose to wear suits too tight. If you wear our suits tight, several advantages will be lost.

1. Movement and ergonomics
2. Air circulation inside suit
3. Recoil damping effect
4. Longevity of the suit

So we kindly remind Distributors and end users to consider wearing the suit slightly oversized and baggy. This will give the added benefits mentioned above.

Best regards Silencer R&D

We hope this can support our BLASTHEROES with information, to keep your safety products to last and keep you safe for longer.
